1. Deliverable Report

1.1 Purpose of this document

With this document we deliver two aspects of QIA dissemination: the public website and the project presentation.

1.2 Public Website

The url to the QIA site is: <http://quantum-internet.team/>. The site is implemented as described in paragraph 2.2.1 *Dissemination and Communication* of the project proposal.

The website will be used as the main vehicle to make available all public deliverables, news on developments, and announce events. Special attention will be paid to ensure high visibility for the potential industrial applications derived in QIA. The site will be updated continuously during the course of the project, and enhanced by additional measures to maximize the dissemination capacity and the reach of innovation from QIA.

1.3 Project Presentation and Brochure

A basic project presentation in pdf format is available in the ABOUT–section of the QIA website as part of the promotion and information package. At a later stage we make available a brochure including a brief description of the main goals of the project, information on the consortium partners and contact details. See paragraph 2.2.1 *Dissemination and Communication* of the project proposal. The presentation and brochure will be updated throughout the project life time.
